

Using the Pyramid Principle to structure your message

The Pyramid Principle can help you deliver a message that is clear, concise, and comprehensive.

- 1 The top statement of your pyramid should answer your audience's key question
- 2 Your conclusion should be backed by a series of arguments that support your conclusion
- 3 Each argument should be backed by data that validates the point you are trying to make
- 4 Arguments and evidence should Mutually Exclusive and Collectively Exhausting (MECE)
